

# PROPER HAND WASHING

Washing your hands frequently with soap and water is the best way to reduce the spread of germs.

Wet your hands with warm running water

Add soap and scrub for 15–20 seconds

Wash backs, thumbs, between fingers, and under nails

Rinse off soap under running water

Dry your hands with a clean towel

Turn off tap with a towel

When soap and water are not available, alcohol-based hand sanitizers can be used if hands are not visibly soiled.
