

Proposals: Washroom Facility

The municipality is looking for proposals from any Victoria County entity (business, individual, community group, non-for-profit) which may have an interest in complementing their operation with a fully constructed washroom facility.

What the Municipality will do:

- Construct & pay for a public washroom – either a single new building or renovate an existing structure

What the entity will do:

- Sign a memorandum of understanding with the Municipality to oversee the washroom operation once constructed

Space/Land Considerations

- Access to a Septic Disposal Field capable of accommodating the washroom discharge or enough property for a new septic field
- Access to water through an existing well
- Area to accommodate parking for 2-3 vehicles, a bus and a 20' x 12' washroom facility

A score will be determined based on above considerations, and whether the washroom facility is self-sufficient with an organization or whether additional funding may be required from the municipality. Completed applications will be assessed by a committee of municipal administration and members of the public.

Any late or incomplete proposals will not be accepted. The Municipality has the right to refuse any or all proposals. Any costs associated with answering this proposal remain solely with those applying.

How to Apply:

Please send a brief outline of how your entity meets the above criteria, your location, and any other information you feel is pertinent to the proposal by **4 pm on Thursday June 17, 2021** to:

Leanne MacEachen, CAO
